DAC LOGIC.py

DAC STREAMLIT.py

input range name

input nr of fixtures

input ch per fixture

input starting adress

3 functions:

first to generate a list or dictionary or combo - I need a list like: Spiider 1 = 1
Spiider 2 = 42

second to output the next available channel

third to trigger an out of range warning (boolean)

DAC STREAMLIT.py

list/dictionary

next available ch

bool range warning
